

Generation Rx: Safe Medication Practices for Life Drug Abuse Prevention Training for Educators

More than

**6 MILLION
AMERICANS**

age 12 and older have used a prescription drug nonmedically in the past month.

**DRUG
OVERDOSE**

is the leading cause of accidental death in the United States.

Approximately

**5,500
AMERICANS**

misuse a prescription medication for the first time every day.

Generation Rx

The mission of Generation Rx is to educate people of all ages about the potential dangers of misusing prescription medications. In doing so, we strive to enhance medication safety among our youth, college students, other adults in our communities, and seniors. Prescription medications can help us live longer and healthier lives, but any medication has the potential to do harm – especially when misused.

During this training you will learn how to utilize the FREE educational tools on the Generation RX website to help you teach about safe medication practices.

The tool kit offers materials for children, teens, college students, adults, seniors, patients, and the workplace.

This program is funded through a mini-grant provided by Ohio State University College of Pharmacy and Cardinal Health.

Wednesday,
March 7

9:00 AM 1st Session

1:00 PM 2nd Session

Greene County Extension

100 Fairground Rd., Xenia
