Join us to learn more about how to start your own garden during COVID-19. You may even learn a quick tip or two for the established home garden. Topics will range from soil health, considerations on what to plant and when, and what to look for if your vegetables are not growing.

This program will be open to the public at not cost. It will feature approximately thirty minutes of planned discussion, then an open forum for home garden questions. If you have questions now, feel free to submit them with the contact information of corboy.3@osu.edu or hupman.5@osu.edu or 937-372-9971.

More information is available at greene.osu.edu.
