Backyard Garden To Fork: Cauliflower, Kohlrabi, and Sunflowers

The Backyard Garden to Fork series will focus on how to grow, harvest, and prepare specific vegetables. This seminar will focus on sunflowers, kohlrabi, and cauliflower.

Learn when and how to harvest and use sunflower seeds. Kohlrabi is extremely easy to grow—find out what is what do you do with it. Cauliflower is one of several vegetables in the Brassicaceae (or Mustard) family. Discover what makes cauliflower different from other Brassicaceae species.
